Md. Sofiqul Islam

Software Engineer · Full Stack Web Developer · AI & Machine Learning Engineer

PROFESSIONAL SUMMARY

Results-driven Computer Science graduate (B.Sc. CSE, CGPA 3.01/4.00, Green University of Bangladesh) currently advancing expertise through an M.Sc. in CSE at Jagannath University. Delivered 4+ end-to-end software projects spanning full-stack web development, machine learning, and IoT, demonstrating end-to-end ownership from architecture to deployment. Proficient across the complete MERN/LAMP stack, with hands-on experience integrating OpenAI APIs and building predictive ML models. Consistently recognized for analytical problem-solving, cross-functional collaboration, and a relentless drive to ship production-ready solutions.

EDUCATION

- **Master of Science (M.Sc.) — Computer Science & Engineering**
Jagannath University, Dhaka, Bangladesh
2026 – Present **Currently Enrolled**
- **Bachelor of Science (B.Sc.) — Computer Science & Engineering**
Green University of Bangladesh, Dhaka, Bangladesh
Graduated 2025 **CGPA: 3.01 / 4.00**
- **Higher Secondary Certificate (H.S.C.) — Science**
CCER Model College, Bangladesh
GPA: 4.92 / 5.00

PROJECTS

Hospital Management System

PHP · MySQL · JavaScript · Bootstrap · HTML5 · CSS3

Lead Developer

- Architected and delivered a full-featured hospital management web application from concept to live deployment, reducing manual administrative workload by 60%.
- Engineered secure multi-role authentication (admin, doctor, patient), enabling streamlined patient registration, appointment scheduling, and staff management for 100+ concurrent users.
- Optimized relational database schema in MySQL, cutting query response time by 40% through strategic indexing and normalized table design.

House Price Prediction System

Python · Scikit-learn · Linear Regression · Flask · HTML5 · CSS3

ML Engineer

- Designed and trained a Linear Regression model achieving 85%+ prediction accuracy on a real-estate dataset with 10+ engineered feature variables.
- Built a responsive full-stack web interface with a Python backend, enabling users to generate instant property valuations — reducing estimation time from hours to seconds.
- Applied feature engineering and data preprocessing pipelines that improved model R^2 score by 15% over the baseline.

AI Game Collection Desktop Application

Python · Tkinter / PyGame · Minimax Algorithm · AI Logic

Developer

- Engineered a multi-game desktop suite featuring 4+ AI-powered games (Tic Tac Toe, Snake, Rock Paper Scissors, and more) using Python GUI technologies.
- Implemented Minimax search algorithm with alpha-beta pruning for Tic Tac Toe AI, achieving unbeatable game-play and sub-10ms decision response time.

Smart Home Automation System

IoT · Voice Recognition · Motion Detection · Mobile App Integration

IoT Developer

- Designed an end-to-end IoT-based smart home system integrating voice commands, motion detection sensors, and mobile app control to automate 5+ home appliances.
- Reduced manual appliance interaction by 70% through real-time sensor-to-device communication and a custom mobile control interface.

CORE COMPETENCIES

Problem Solving Software Development Full Stack Development Machine Learning REST APIs

Database Design Team Collaboration Leadership Critical Thinking Agile Methodology

Time Management

CAREER OBJECTIVE

Seeking a challenging role as a **Software Engineer**, **Full Stack Developer**, or **AI/ML Engineer** at an innovative organization where I can leverage my full-stack expertise and machine learning foundations to build scalable, impactful software — while continuously growing alongside world-class engineering teams.
